2

3. Comment. Dispatch of old oil for regeneration.
4. Comment. The air force fuel depot dispatched 148 carloads or 2,629 metric tons in January 1953 and 215 carloads or 4,082 metric tons in February 1953. The delivery during the time of observation was below the average quantity of the preceding months, which corresponds to little flying activity during the bad weather season. 25X1
5. Comment. The army depot delivered 58 carloads or 901 metric tons in January 1953 and 60 carloads or 861 metric tons in February 1953. The increased delivery in December 1952, which amounted to 143 carloads with 2,089 metric tons, was doubtlessly to refill the stock after the fall maneuvers. The fact that the fuel delivery dropped during the period of observation is interpreted by the decreased fuel consumption during individual training. 25X1
